BASICS

NOTABLES

Complex
abstractions

Designed and led development of payment details UI & Frontend abstraction that scaled automatically with new payment methods, processing services and 3rd party services being added constantly by connections team which provided unparalled insights into customers payment stack.

Frontend
as a whole

Comfortable defining & improving the whole frontend stack, leading team discussions and RFCs across the board. From core products to marketing website and docs maintained by non-technical people.

1000s
campaigns

Led both front-end and back-end for automated system that allowed team to launch thousands of campaigns, adsets and ads with few clicks, using pre-defined templates, yet allowing full control via custom config tweaks.

180×
speed up

Author of internal tools for very rapid scaffolding of datasets locally covering many scenarios for team to quickly iterate over new and existing features. These changed an hour and half long process to an unnoticeable 30sec quick task.

SOFT SKILLS

CODE REVIEWS
Very comfortable with Code reviews of everything that goes into a Product with strong focus on discovering hidden bugs and forgotten use cases.

DESIGN COLLABORATION
Preferring very close relationship with Designers, iterating over multiple versions of designs to achieve great UX and avoid difficult or unreal solutions.

ZOOM IN, ZOOM OUT
Ability to think in big picture, yet care and push for the smallest details when needed.

PROCESS ORIENTED
Used to inventing and implementing new processes. Team, department and company levels alike.

UX
Strong advocate for great UX, Human Centered Approach and Personification.

FRONTEND HIRING
Defining code challenges for various frontend roles and subsequently interviewing & evaluating the candidates.

3 years

EDU

B.Sc. IN INFORMATICS
Masaryk University
2011 Graduate

I am delighted to write a recommendation for Jan, a talented front-end developer whom I had the pleasure of working with at Primer for two years. Although we didn't work directly together, I had the opportunity to observe his work closely and was consistently impressed by his contributions to the team.

Jan played a critical role in building the initial versions of our dashboard, and his technical expertise was instrumental in creating an intuitive and user-friendly interface. He demonstrated exceptional resilience throughout his tenure at Primer, consistently delivering high-quality work and stepping up to the plate during the most challenging times.

Beyond his technical skills, Jan was an incredibly kind and friendly person who was always willing to lend a helping hand to his colleagues. He was a valued member of our team thanks to his collaborative nature and attitude.

Overall, I wholeheartedly recommend Jan for any front-end development position. He is a skilled and hardworking developer who has proven himself to be a reliable and valuable team player. I am confident that he will continue to excel in his career and make significant contributions to any organization lucky enough to work with him.

Jean-Baptiste Martin
Team Lead of entire Processing Group at Primer, Employee #1 at Primer
JB was senior to me, but did not manage me directly

It has been an immense pleasure to work closely with Jan for about two years. His attention to detail, sense of ownership, and genuine passion for code and product are simply admirable. He knows a great deal about how to own an entire frontend codebase while maintaining the standards high. I highly recommend hiring Jan to kickstart any innovative and complex projects!

Aladin Taleb
DX Team Lead & Product Manager at Primer
Aladin and me worked on the same team

It's was certainly a pleasure getting to know and work with Jan over the last couple of years, and we've been lucky enough to meet a few times IRL too! Although we've never worked directly with each other, it's extremely apparent that Jan is dedicated, hard working, determined and always looking to push those around him to do their best work.

A great culture builder, Jan is a conscious and thoughtful teammate who is always more than happy to be involved with initiatives that drive culture forward and contribute to the greater experience of work.

It's been a privilege working towards the same goal and I know that Jan will bring a huge amount of value and impact from day 1, to any team lucky enough to have him!

Erin Potter
Head of People & Operations at Primer
Erin was senior to me, but did not manage me directly

Jan was one of our early hires and his passion, detail-orientation, and ability to bridge product, design and engineering were key to fast iteration on a new product. As company matured, so did Jan and he led development of multiple features from start to finish.

Peter Sandtner
Former VP of Engineering Operam, Forbes.sk 30 under 30
Peter managed me directly
